

## Notice

### Re- Winter Road closure 2025

Chief and Council are officially closing the winter road on Monday March 31,2025. It was a successful winter road season; we were able to transport approximately 50 transport loads bringing in housing and other major project materials ( detox facility and traditional healing building) , gasoline fill up for the store and new 50,000-liter tank for the store, new vehicles for snow plow, new septic truck, new heating fuel oil truck, three vehicles for our new mental health program, trailer office for mining resource meetings. The winter road also afforded MTO to bring in loads and also enabled LTL Construction to do the under the Albany River directional drilling for the fibre optic internet cable. The road also enabled members to bring in supplies and new vehicles.

After March 31, there will be no maintenance of the road, and it will be travel at your own risk.

I thank all the council and staff that contributed to the successful winter road season.

Meegwetch and stay safe!

Chief Bruce Achneepineskum on behalf of Marten Falls FN Council
